# Chapter 10
## Configuring DNS

## Activity Known Issues

| Activity | Issues |
|---|---|
| 10-1 | *Before starting this lab (p.454), check the following:*<br>1. You have an Internet connection from 410Server1<br>2. Change the IPv6 address on the Ethernet0 interface from static to DHCP<br>3. Using DNS Manager, check if there is a Forwarder configured. If so, delete the forwarder. |
| 10-2 | *Step 10, p. 462: Reads:*<br>Set-DNSClientServerAddress Ethernet<br>*Should read:*<br>Set-DNSClientServerAddress Ethernet0<br><br>*Step 11, p. 462: Reads:*<br>Set-DNSClient Ethernet<br>*Should read:*<br>Set-DNSClient Ethernet0 |
