Errata File for MCSA Guide to Configuring Advanced Windows Server 2012/R2 Services, Exam 70-412

If you have errata to contribute, please send me an email at books@tomsho.com.

Page	Location	Description	Explanation
Chapter 3			
93	Activity 3-3	The PowerShell commands in Steps 2 and 3 should be swapped. In step 2, use Add-DhcpServerV4Scope and in Step 3, use Add-DhcpServerV4SuperScope.	
Chapter 7			
269	Activity 7-2, Step 10	*It appears that there is a space after the parenthesized part of the command; that is a result, of the Courier 10 font spacing. It should look like:* **(Get-ClusterNode 412Server2).NodeWeight=0**	There is no error in the command, but the Courier 10 font spacing makes it appear as though there is a space after the right-parenthesis. There should not be a space.
288	Key Terms: **live migration**	*The definition for **live migration** is incorrect. The definition should be:* A Hyper-V feature that enables an administrator to move a VM from one Hyper-V server to another while maintaining the VM's availability	The definition shown for "live migration" is actually for "clustered application" from Chapter 6.
290	Review Question #10	*Last sentence of the question reads:* "Why did this problem occur?" *Should read:* "What caused this result?"	The result is not actually a "problem." It is the way dynamic quorum is intended to work.
Chapter 10			
395	User Exclusion bullet item	*Reads:* When you add a user, you must enable use exclusion… *Should read:* When you add a user, you must enable use**r** exclusion…
